Everything You Wanted to Know About Go and Didn't Know to Ask

Raymond E. Marcil <marcilr@gmail.com>

Revision 52 (February 4, 2013)

#### Abstract

Working at GCI Network Services, OSS I needed a location for Go documentation. Hence this document.

## List of Definitions and Abbreviations

• MOA - Municipality of Anchorage

## Introduction

Introduction to the LATEX Template with Examples.

#### Comments

COMMENTS Comment — Sean Weems, Spring 2003

We should get the COMMENTS column searchable via the landrecords application before we do much anything else – shouldn't be too hard.

Errata: Plats spanning multiple sections

A few anomalies can be observed in the AKPLATS table. Specifically plats exist that span multiple sections. Since the table only has a single column, SCODE, that accepts a single section code, SGU (Status Graphics Unit) has handled this problem by entering multiple rows in the table, each with a different section that point to the same plat or file. Multiple section plats are indicated by setting the TCODE column to the value 37, and making an appropriate notation like Section 24-25-26-27 in the REMARKS column.

[FIXME: Perhaps the SCODE column should accept an array of sections?]

Packages

**Functions** 

## Variables

## Flow Control

Flow control of code using conditionals like for, if, else, switch, and defer.<sup>1</sup>

<sup>&</sup>lt;sup>1</sup> "Flow control statements: for, if, else, switch and defer. Learn how to control the flow of your code with conditionals, loops, switches and defers." https://tour.golang.org/list

# **Types**

Type such as arrays, structs, slices, and maps.<sup>2</sup>

<sup>&</sup>lt;sup>2</sup> "More types: structs, slices, and maps. Learn how to define types based on existing ones: this lesson covers structs, arrays, slices, and maps." https://tour.golang.org/list

Examples

#### Verbatim

"The verbatim environment is a paragraph-making environment that gets LaTeX to print exactly what you type in. It turns LaTeX into a typewriter with carriage returns and blanks having the same effect that they would on a typewriter."

```
\begin{verbatim}
          text
\end{verbatim\}
```

### Figure formatting with verbatim

The following figure leverages verbatim for proper formatting:

```

## **Appendix**

#### Links

A Tour of Go

The tour covers the most important features of the language, mainly: Basics (Packages, variables, functions, flow control statements: for, if, else, switch, defer, more types: structs, slices, and maps), Methods and interfaces, and Concurrency.

https://tour.golang.org/welcome/1

Package types

import "go/types"

Package types declares the data types and implements the algorithms for type-checking of Go packages. Use Config.Check to invoke the type checker for a package. Alternatively, create a new type checked with NewChecker and invoke it incrementally by calling Checker.Files.

The Go Programming Language
